**I am a Software Developer specializing in Full-stack Development. I am looking for an agile software organization where I can use my skills to build great software.**

## Professional Experience

**Frontend Developer**                      **Klarälvenstād**                      **May 2022 – Present**  
Karlstad, Sweden

Responsible for developing, maintaining and updating website:

- Optimized code, cross-browser compatibility, and web features using HTML, CSS and JavaScript.
- Implementing a mobile first approach to existing website while enhancing user engagement.
- Perform code review and bug fixes while resolving website performance issues.

Technologies: *HTML, CSS, JavaScript, Git, Github,*

**Full-Stack Developer**                      **Nilssonsstādjtjänst**                      **September 2019–April 2022**  
Karlstad, Sweden

Primarily responsible for development, using cutting edge technologies and features:

- Increased user's experience through carousel encapsulation by providing a better visual experience while aiming for lighter abstractions.
- Implementation of a variety of features, from Google Cloud API Library, to EmailJS directly from JavaScript, as well as improving code quality and performance.
- Helped ensure a smooth migration browsing process when switching from one page to another for a better user experience.
- Ensured code was clean, functional and efficient by extending and maintaining periodic bug fixing and ensuring appropriate code coverage.
- Ensuring a cross-functionality between Flask and MongoDB while using the command-line tools to manipulate data and connecting MongoDB using python.
- Implementation of CRUD functionalities, User Authentication and authorization with Werkzeug security helpers to make user authentication more secured.
- Ensured best practices by implementation of Mailgun API, to provide users with a review of their activities.

**Technologies:** *Python, Flask, MongoDB, JavaScript, Git, GitHub, Google Cloud APIs*

**Frontend Developer**                      **TeksTedia**                      **June 2015 - April 2016**  
Buea, Cameroon

Building different frontend applications using React, TypeScript and its ecosystem:

- Delivered critical features on our main web development projects under tough deadlines and company wide attention such as official government websites.
- Automated a 5 steps process freeing up to 8 weekly hours from our customer support team through an image processing service built on top of Node.js and AWS that allowed our customers to self service.
- Supporting my team during the frontend section of the life cycle from concept, implementation, and testing.
- 15+ successful releases, over 50 frontend features delivered, and 100+ customer requests served.

**Technologies:** *JavaScript, React, Typescript, Git, GitHub, HTML, CSS, MongoDB,*

## Education

- **Full-stack Developer student at Code Institute, Dublin.**
- Linneaus University Växjö, Sweden.

August **2018**–September **2019**  
September **2017** – June **2018**

## Skills and Technologies

- Languages: JavaScript, Python
- Technologies: HTML, CSS, Bootstrap, React, Typescript, Node, AWS, GCP, Django, Git, GitHub, Sql, MySQL, NodeJS, MongoDB, Heroku, Stripe, webdriverIO
- Other: Web Performance, AWS Well-Architected framework, Microservices Architecture

## Projects & Extra

- <https://boss-ecommerce.herokuapp.com>
- <https://nilssonsstadtjanst.herokuapp.com>
- <https://gerardambe.github.io/UCD-Resume>

## Languages

---

- English: Native Proficiency
- French: Intermediate
- Swedish: Advanced

## Hobbies & Personal

---

- In my free time I like to spend time with my family, read about technology and explore Sweden.
